

PermaPel® GA-75XD
Water Repellent Acrylic Emulsion Polymer

PermaPel GA-75XD is a **Mctron Technologies** polymer that has been designed to incorporate our wash durable specialty monomer technology into a typical RC controlled polymerization system with the addition of a non-formaldehyde generating crosslinker. The RC technology has historically been used in floor polishes, graphic arts polymers and overprint varnishes. This product has superior adhesion with hard to wet substrates such as fiberglass, plastic film, foil and galvanized aluminum. **PermaPel GA-75XD** is crosslinked with a non-formaldehyde generating crosslinking system that allows for a stronger cure and additional heat resistance.

TYPICAL PROPERIES

Type	Styrene Acrylic Emulsion
Total Solids	50%
Viscosity	<800 cP (RV 2 @60rpm)
pH	2.5
Tg	+50

Performance Features

Rheology Controlled Stabilization - Surfactant Free - Glycol Ether Free - Food Contact Compliant - Permanent Water Resistance in Polymer Backbone - Superior Adhesion to Hard to Wet Surfaces

Let MCTRON Technologies raise your expectations.

McTron Technologies, LLC Technical Support Team is available to provide assistance with the formulation of all our products to optimally suit your specific needs.

McTron Technologies LLC Guarantee

If any product is defective in workmanship or materials, McTron Technologies, LLC will replace the product, or refund the full purchase price. This warranty is in place of all other warrants, expressed or implied, and all implied warrants of a product for an intended use shall be solely up to the user. McTron Technologies, LLC assumes no liability for consequential damages. Its liability shall in no event exceed the purchase price of materials supplied by it.
