

MaxxBreak SYN-4
Coating Antifoam

MaxxBreak SYN-4 is a mineral free product designed for a wide range of industrial coating applications. It is particularly effective in latex paints, adhesives Flexo inks, and paper coatings. **MaxxBreak SYN-4** is highly effective in formulations containing styrene butadiene, acrylic, Neoprene, polyvinyl acetate, acetoxylated polyethylene and other latexes. It is also effective in water-based inks, paper machine white water, pulp slurries, pulp manufacturing, latex manufacturing, monomer stripping and a variety of water treatment applications.

MaxxBreak SYN-4 can be added as received or diluted with water or one of the formula ingredients prior to use. Normally 0.05 – 0.1% will effectively prevent air entrapment in most systems. In paint or pigmented coating applications, it is usually advantageous to divide the defoamer addition into two parts. One part is added to the pigment prior to grinding and the second part added to the letdown portion of the paint or coating.

MaxxBreak SYN-4 is a highly effective, extremely long lasting antifoaming agent. If frozen, **MaxxBreak SYN-4**, should be warmed to room temperature and mixed prior to use.

TYPICAL PROPERTIES

Color	Pale yellow
Ionic Nature	Nonionic
Viscosity	Fluid
Active Ingredients	100%
Solubility	Dispersible
Flash Point	Over 350°F

PERFORMANCE FEATURES

Mineral Free, Versatile, Highly Effective

SUGGESTED USES

Latex Paints, Pulp & Paper, Monomer Stripping, Wastewater

Let MCTRON Technologies raise your expectations.

McTron Technologies, LLC Technical Support Team is available to provide assistance with the formulation of all our products to optimally suit your specific needs.

McTron Technologies LLC Guarantee

If any product is defective in workmanship or materials, McTron Technologies, LLC will replace the product, or refund the full purchase price.
