

MaxxThix® AT-17

McTron MaxxThix AT 17 is an associative thickener. It is supplied as an easy to use alkali swellable emulsion. It is designed for coatings with a “yield point” which flow readily under shear (such as brushing) yet which will not run (sag) when the shear is removed. Dyes thickened slightly with this product will not bleed through a paper towel. It keeps coatings on the surface of a substrate (minimal penetration).

TYPICAL PROPERTIES

pH	2.0
Total Solids	32%
Weight per Gallon	8.7
1% Viscosity (in Water@ pH 8)	18,000

PERFORMANCE FEATURES

- Excellent Efficiency
- Very Good Consistency
- Economical
- Unique Rheology
- Minimizes Coating Penetration
- Good flow when brushed or rolled.
