

## Maxxacryl AC-2163 Acrylic Emulsion Polymer

**Maxxacryl AC-2163** is a high solids acrylic emulsion polymer used in a variety of high performance caulk and adhesive formulations. **Maxxacryl AC-2163** provides excellent water resistance, good exterior durability, and is compatible with a large variety of other formulating ingredients such as fillers, pigments, and dyes. When formulated properly **Maxxacryl AC-2163** can meet the needs of an economical caulk to a high performance caulk meeting C920, class A and B sealants

### TYPICAL PROPERTIES

Type	Acrylic Emulsion Polymer
Appearance	Opaque White Liquid
Total Solids	57-59%
pH	2.5-4.5
Viscosity	~500 cps

### Performance Features

Excellent pigment binding strength – High filler capacity – High solids – Good viscosity control -

### Suggested Use

Caulks - Adhesives

### Let MCTRON Technologies raise your expectations.

McTron Technologies, LLC Technical Support Team is available to provide assistance with the formulation of all our products to optimally suit your specific needs.

### McTron Technologies LLC Guarantee

If any product is defective in workmanship or materials, McTron Technologies, LLC will replace the product, or refund the full purchase price. This warranty is in place of all other warrants, expressed or implied, and all implied warrants of a product for an intended use shall be solely up to the user. McTron Technologies, LLC assumes no liability for consequential damages. Its liability shall in no event exceed the purchase price of materials supplied by it.
